## Reason for Change

A query was raised via Betsi Cadwaladr University Local Health Board in regards to the time format in critical care reporting, following system updates locally time fields were submitted in the format hh.mm.ss based on data dictionary definitions. This however resulted in a failed VASS check. It was established that the VASS checks for time data items were in line with other live data sets in hh:mm:ss format. Suggesting the Data Dictionary published format is in error. The change is to therefore bring Critical Care time fields in line with other current live datasets.

- Critical Care Discharge Ready Time format adjusted from hh.mm.ss to hh:mm:ss
