

WELSH INFORMATION STANDARDS BOARD

DSC Notice:	DSCN 2019/09
Date of Issue:	10 th December 2019

Ministerial / Official Letter: n/a	Subject: National Cancer Data Standards for Wales – Core * * (For the purposes of COSD v9 reference, includes Pathology v4)
Sponsor: Cancer Implementation Group (CIG) Welsh Government	
Implementation Date: The Cancer Informatics Solution (CIS) MUST comply with this Standard with immediate effect. Services/data providers, however, MUST operate to ' business as usual ' in terms of the data being collected and reported (see section Actions Required in this Notice)	

DATA STANDARDS CHANGE NOTICE

A Data Standards Change Notice (DSCN) is an information mandate for a new or revised information standard.

This DSCN was approved by the Welsh Information Standards Board (WISB) at its meeting on 24th October 2019

WISB Reference: ISRN 2018 / 018

Summary:

To introduce a new standard for the Core cancer minimum reporting requirement (applicable to all cancer tumour sites).

Whilst this introduces a change to an existing information standard, the immediate use of this mandate will be used as a framework for the development of the CIS, therefore services/data providers should continue with '**business as usual**' in terms of the data being collected and reported (see section [Actions Required](#) in this Notice).

Data sets / returns affected:

All Wales Core Cancer Minimum Reporting Requirements v5.0

Please address enquiries about this Data Standards Change Notice to the Data Standards Team in NHS Wales Informatics Service

E-mail: data.standards@wales.nhs.uk / Tel: 02920502539

The Welsh Information Standards Board is responsible for appraising information standards. Submission documents and WISB Outcomes relating to the approval of this standard can be found at:

<http://howis.wales.nhs.uk/sites3/page.cfm?orgid=742&pid=24632>

DATA STANDARDS CHANGE NOTICE

Introduction

The original All Wales Cancer Minimum Reporting Requirements were mandated via a Data Standards Change Notice (DSCN) in March 2011 (<http://nww.nwisinformationstandards.wales.nhs.uk/sitesplus/documents/299/CDSCN%202011%20-%202001%20Core%20Cancer%20MRR%20v5.pdf>)

A revision of the existing all Wales Core Cancer Minimum Reporting Requirements together with the development of new Site Specific cancer Minimum Reporting Requirements is necessary to ensure Wales has effective, efficient and timely world-class healthcare information to provide intelligence and the insight to drive healthcare service improvements.

Ultimately, new and revised data standards will be delivered as follows:

Revision of:

- Core cancer minimum reporting requirement (applicable to all cancer tumour sites)
- Site specific cancer minimum reporting requirements for:
 - Breast
 - Colorectal
 - Gynaecology
 - Lung
 - Head and Neck
 - Upper GI (Oesophago-Gastric, NET, Pancreas, Liver, High Grade Dysplasia)
 - Urology
 - Radiotherapy (RTDS)

New

- Brain & Central Nervous System (CNS)
- Childhood
- Teenagers & Young Adults (TYA)
- Haematology (Lymphoma, Leukaemia, Myeloma)
- Sarcoma
- Skin
- Thyroid & Endocrine
- Acute Oncology (AOS)
- Rehabilitation
- Systemic Anti-Cancer Treatment (SACT)
- Imaging (Radiology)
- Pathology WLIMS (Royal College of Pathology - template reporting)

This Notice is the first of the Standards within those deliverables and encompasses the **Core cancer minimum reporting requirement (applicable to all cancer tumour sites)**.

Description of Change

This Standard covers the Data Items listed in NHS England Cancer Outcome and Services Data set (COSD) V9.0 (which includes Pathology V4.0) for comparability and additional items to reflect NHS Wales reporting.

Whilst this introduces a change to an existing information standard, the immediate use of this mandate will be used as a framework for the development of the CIS, therefore services/data providers should continue with '**business as usual**' in terms of the data being collected and reported (see section [Actions Required](#) in this Notice).

Typically, within the DSCN we use a combination of 'strike through' and highlighted text to denote changes to the existing standard, however given that there have been a number of iterations of the COSD in England since the publication of the All Wales Cancer Minimum Reporting Requirements in Wales, for usability this practice has not been followed in this document.

Data Dictionary Version

Where applicable, this DSCN reflects changes introduced by DSCN and/or DDCN since the release of version 4.10 of the NHS Wales Data Dictionary.

Given that the immediate use of this mandate will be as a framework for the development of the CIS only, the changes introduced by this DSCN will not be published to the NHS Wales Data Dictionary until such time that it applies to a wider audience and fully replaces the existing Standard.

Actions Required

Actions for the NHS Wales Informatics Service:

- To apply this Standard with immediate effect in the development of the CIS
- Continue to make routine extracts available to the Welsh Cancer Intelligence and Surveillance Unit (WCISU) for the purpose of cancer registration via existing means.

Actions for Health Boards/Trusts:

There are no actions for health boards/trusts with regards to the changes in this Standard presently. However, health boards are expected to continue with '**business as usual**' as it pertains to the existing Standard, namely to collect and report data using existing national systems, i.e. CanISC, PMS, WPAS, Tracker 7 for the following:

- National Cancer Audits for Wales - a Tier 1 Welsh Government requirement
- Collection and reporting to the existing standards for cancer, the All Wales Core and Site-specific minimum reporting requirements (see <http://howis.wales.nhs.uk/sites3/page.cfm?orgid=769&pid=19419>)
- Collection and reporting of data required for Cancer Waiting Times and Single Cancer Pathway as per DSCNs issued.

In conjunction with the above points for Health Boards/Trusts, it is also important to note that:

Interim changes are currently in development for WPAS and Tracker 7 to support the single cancer pathway data collection.

That data continues to be entered into the CWT fields within CanISC, as many standard reports rely on the completion of those data items in report logic. Such reports continue to be used for many reporting purposes including national audit submissions.

SPECIFICATION

Information Specification

The associated document (see 20191210-SPEC-DSCN 2019 09-National Cancer Data Standards for Wales - Core-v1-0.pdf) lists the Data Items required for National Cancer Data Standards for Wales – Core and their equivalent labels in the NHS Wales data Dictionary and/or COSD V9.0 where they exist.

Where the specification cites **NHS Wales Data Dictionary**, please refer to the Dictionary for the relevant guidance i.e. definition, format or code list.

For consistency, all dates listed in the Specification are standardised as ccyyymmdd.

Where D is denoted in Status, this indicates that the information should be derived from another Data Item. This typically occurs with Data Items that are simply text representations of their code counterparts.
