### DATA STANDARDS CHANGE NOTICE

#### Introduction

Main Specialty Codes are a unique code identifying each Main Specialty designated by Royal Colleges. Specialties are divisions of clinical work which may be defined by body systems (dermatology), age (paediatrics), clinical technology (nuclear medicine), clinical function (rheumatology), group of diseases (oncology) or combinations of these factors. Only Specialty titles recognised by the Royal Colleges and Faculties should be used. This list is maintained by the General and Specialist Medical Practice (Education, Training and Qualifications) Order 2003 and European Primary and Specialist Dental Qualifications Regulations 1998.

Each Consultant should be assigned a Main Specialty by the Organisation to which the Consultant is contracted.

DSCN (2013 / 12) was issued to update the NHS Wales definition of Main Specialty and to clarify that the titles are approved by the Royal Colleges and Faculties. This has formed part of an ongoing work programme to review and update definitions/codes associated with the Main Specialties list so that it is aligned to specialties recognised by the Royal Colleges and Faculties and the General Dental Council.

#### Description of Change

To update the NHS Wales Main Specialty list to align with recent changes published by NHS Digital. The descriptions and rationale for the changes to the NHS Digital Data Model and Dictionary are outlined in <u>Change Specification v1.1 (Amd 45/2019)</u>.

The changes to the NHS Wales Data Dictionary include:

- The addition of 3 new Main Specialty codes.
- Changes to titles and descriptions of several existing Main Specialty codes to better reflect the description of the specialties being provided.
- The addition of a comments column to the Main Specialty code table. These fields include links to the Royal Colleges specialties for further granularity.

#### Data Dictionary Version

Where applicable, this DSCN reflects changes introduced by DSCN and/or DDCN since the release of version 4.15 of the NHS Wales Data Dictionary.

The changes introduced by such DSCNs will be published in version 4.16 of the NHS Wales Data Dictionary.

#### Actions Required

Digital Health and Care Wales:

• Ensure affected national applications managed by DHCW are upgraded so that the updated list of Main Specialty codes can be stored within the system.

#### **Implementation**

This standard introduces a change to the Main Specialty code list published on the NHS Wales Data Dictionary which will be updated with immediate effect at the next possible release date of dictionary.

Due to system and operational pressures, stakeholders were unable to indicate dedicated implementation plans and timescales within their impact assessment responses. Thus, the Data Standards Team suggested that a National Task and Finish Group should be established to manage the implementation. Implementation plans will also need to be developed in partnership with the national WPAS Team, and individual health boards to complete this piece of work.

# Appendix A: Table reflecting areas that are impacted as a result of this DSCN

The following table shows where there are changes to the scope and/or definitions of applicable data sets, data items, terms and other associated areas that are linked with the changes documented within this DSCN.

Each data definition type is listed in alphabetical order and is shown in the sequence in which it appears in this DSCN.

Data Definition	Name	New/Retired/	Page
Type		Changed	Number
Data Item	Main Specialty (Consultant)	Changed	5

# <u>Appendix B</u>: Highlighted changes to be made to the NHS Wales Data Dictionary

Changes to the NHS Wales Data Dictionary are detailed below, with new text being highlighted in **blue** and deletions are shown with a **strikethrough**. The text shaded in **grey** shows existing text copied from the NHS Wales Data Dictionary.

### Main Specialty (Consultant)

(This data item was formerly known as 'Specialty Function Code' with the new title being implemented from 15<sup>th</sup> May 2006)

This data item is / was included in the following data sets / collections between the dates shown:

Data Set / Collection	Valid From	Valid To
APC ds99	1 <sup>st</sup> April 1999

OP ds	1 <sup>st</sup> April 1999	
RTT	1 <sup>st</sup> April 2007	31 <sup>st</sup> August 2011
PP01W		8 <sup>th</sup> February 2021
OPR ds	1 <sup>st</sup> July 2008	
RTT-PTR	1 <sup>st</sup> September 2008	30 <sup>th</sup> September 2009
National Cancer Ds – Core		
National Cancer Ds - SACT		

A unique code identifying each Main Specialty designated by Royal Colleges. Specialties are divisions of clinical work which may be defined by body systems (dermatology), age (paediatrics), clinical technology (nuclear medicine), clinical function (rheumatology), group of diseases (oncology) or combinations of these factors. Only Specialty titles recognised by the Royal Colleges and Faculties should be used. This list is maintained by the General and Specialist Medical Practice (Education, Training and Qualifications) Order 2003 and European Primary and Specialist Dental Qualifications Regulations 1998.

Each consultant should be assigned a Main Specialty by the organisation to which the consultant is contracted. For physicians and surgeons with a generalist component to their work, the Main Specialty should be general medicine or general surgery. The hallmark of a general physician or general surgeon is the continued care of unselected emergency referrals. The Main Specialty is specific to a Health Care Provider. If, for example, a consultant physician working in two Health Care Providers has a generalist component to the work in one and not the other, general medicine is only assigned as the Main Specialty in the former case. Consultants in general medicine or general surgery may also have specialist interests and these should be recorded as well as the Main Specialty.

The initial source of the information should be the designation on the consultant's contract. This should be checked periodically against the work a consultant is actually doing so that the statistics can relate to a consultant's current type of work.

The Main Specialty only should be used for the purpose of producing Specialty costing statistics and for Workforce statistics where links with activity and finance are required. Other specialist interests of consultants may be recorded for workforce planning purposes.

The Main Specialty code for general practitioners is General Medical Practice or General Dental Practice.

Joint Consultant Clinic activity should be recorded against the Main Specialty code of the consultant managing the clinic.

Where the response for data item (Consultation method) is

 Virtual Clinical Review (Non-Patient Contact), record the main specialty of the lead consultant

Format: 3 digit numeric
